This is a grid map of the USA, created in MS EXCEL, showing all 488 grids included in the FFMA award. It is possible, using the "fill" function of EXCEL to color backgrounds of individual grids, example; YELLOW=NEED, ORANGE=WORKED, RED=QSL Requested, BLUE = Confirmed, GREEN = ARRL Verified.

Created By: N7KA March 2009.

Description

WSJT facilitates basic digital communication using protocols explicitly optimized for a number of different propagation modes.

Protocols

See User's Guide for details.

- **FSK441** for meteor scatter
- **JT6M** for ionospheric scatter
- **JT65** for EME at VHF/UHF, and for HF skywave propagation
- **JT2, JT4, WSPR**: experimental modes

What is WSJT?

[WSJT](#) ("Weak Signal Communication, by Joe Taylor K1JT") offers specific digital protocols optimized for meteor scatter, ionospheric scatter, and EME (moonbounce) at VHF/UHF, as well as HF skywave propagation. The program can decode fraction-of-a-second signals reflected from ionized meteor trails and steady signals 10 dB below the audible threshold. A beta release of **WSJT 9.0** is now available.

FSK441 for meteor scatter

JT6M for ionospheric scatter (version 7 and earlier)

ISCAT for ionospheric scatter (version 9)

JT65 for EME at VHF/UHF, and for HF skywave propagation

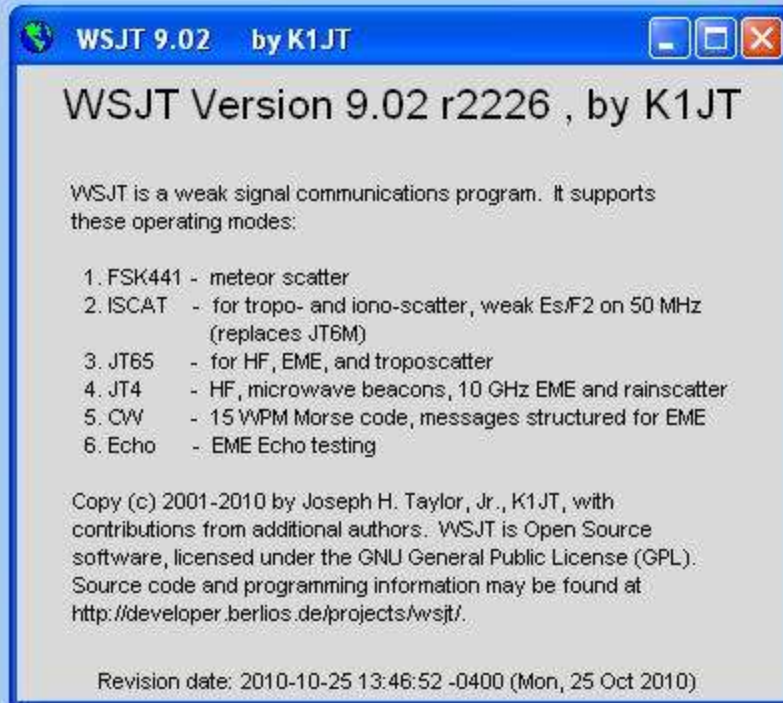

Operating Systems

WSJT was originally developed in the heyday of WindowsXP™. Although users have brought it to other Windows™ versions and other operating platforms, when it comes to common home computers and laptops it still seems to perform best on WindowsXP™ machines.

For computer experimenters, there is a download version for the Linux operating system, as well as notes on K1JT's WSJT site for using WSJT with other operating systems.

The about screen from WSJT 9.02 shows the most current release and decoding modes and their purposes... This install was July 14, 2011. We're ready to configure our WSJT application and get ready for some digital operating!

During a shower many meteors will travel through the ionosphere

If a radio signal is heading in the direction of the meteor's ion trail it can be reflected back to earth
